**Program**

## Dear Friends and Colleagues,

On behalf of the Euro EUS Scientific Committee and as your host for our 9<sup>th</sup> annual meeting I would like to greet you with the warmest welcome to France.

Following the tradition of excellence of this workshop we are proud to present our distinguished faculty consisting of many world known experts in EUS and endoscopy at large.

Together we will bring you the latest developments and technologies in the field of endosonography defining the role of EUS in the wider frame of modern digestive endoscopy. We encourage you to take advantage of the opportunity to present your work and achievements and to actively participate in the various debates and discussions.

The core element of this workshop is live demonstrations and this year we also want to show the pivotal role of EUS in the management of GI and lung cancers. We will, as always, focus on teaching EUS from indication to the procedure itself.

The course is meant both for the experienced and the less experienced endoscopist. As the combined training of doctors and nurses becomes more and more the standard, we truly hope to welcome many EUS-teams in Marseille.

Marseille is one of the oldest cities of the Mediterranean area created 26<sup>th</sup> centuries ago. You will enjoy sun, sea, the cathedral "Notre Dame de la Garde", the old harbor and one of the most famous soccer place in Europe: the Velodrome Stadium.

We are committed to the success of this workshop and we are sure that you will enjoy a profound professional and personal experience.

See you all soon,

M. Giovannini

Dr. P.G. Arcidiacono

"In the mid 90's when linear echoendoscopy was introduced in clinical settings, only a few pioneers thought that it would change the diagnostic algorithm of GI tumours. Working in a high volume Cancer Center, I have had the opportunity to be part of this change and to appreciate Cook Medical's capability to look to the future, understanding the potential of a new technique and the needs of the specialists. During the last 15 years, Cook's development of needles that are more and more efficient in obtaining high quality cyto-histologic specimens, together with an impressive increase in needle visibility have simplified the job of both expert endosonographers and of those who are starting out in endosonography".

## Call for Papers

You are kindly invited to submit abstracts describing original research work on EUS and very instructive clinical cases that you wish to present at the congress as an oral communication.

**Please read the following guidelines for the submission of abstracts carefully before submitting your abstract:**

1. Authors presenting abstracts must be registered participants.
2. Abstracts can only be submitted in English and **only to the address on the right.**

3. Titles should contain no more than 70 characters, including space. The rest of the abstract text should contain no more than 250 words.
4. Authors' name, institution and city should be included. Please omit titles and degrees.
5. Single space all typing. Do not leave blank lines. Use standard abbreviations. Place a special or unusual abbreviation in parenthesis after the full word the first time it appears.
6. The abstract should be informative and clearly structured, containing:
  - an introduction with a brief statement of the study's specific objectives;
  - a summary of the results obtained;
  - a statement of the conclusions.
7. Please avoid references. However, if references are used they should be included in the text as: (Authors, journal, year, volume, pages).
8. Abstracts, which do not conform to the guidelines, will be returned to their authors for correction.

**All abstracts must be submitted no later than April 25, 2011.**

**Abstracts may be sent on CD-ROM, by mail or by e-mail to:**

● **Dr. Marc Giovannini**  
 Institut Paoli-Calmettes  
 232 Bd Ste Marguerite  
 F-13009 Marseille Cedex 9
